

28-09-2026

Date: 1130 PM

Sun Mon Tue Wed Thu Fri Sat

Meeting No 1

Project : Namal Med-Core (NMC)
Purpose : A real problem at namal dispensary and its software solution.
Requirement Provider : Dr. Rabia Zafar
Features & requirements :

- Patient details, visit info and medical issues can be recorded & retrieved when needed.
- Medicine stock, quantities & expiry dates can also be monitored.
- A digital medical & inventory management system will handle the problem.
- Patient's data will be kept highly confidential.
- Only the medical officer & her assistants can have access to Patient's data.

5-10-2026

9-9:20AM

Meeting No 2

Namal Med-care (NMC)

Requirement provider requested additions:

- The system should maintain relevant patient's info, including department, year, allergies and relevant medical history.
- Patient visit records should include relevant diagnosis and medicines prescribed or issued.
- Medicine inventory should include quantities, batch no & expiry dates.
- System should help authorized staff

identify low stock & expired or soon to expire medicines.

→ Search facilities should make it easier to find existing patient & inventory records.

2:50 - 3:10PM

8-10-2026

Meeting No 3

Namal Med-Care (NMC)

Final adjustments:

→ The system will support record-keeping and inventory management, it will not replace the Medical officer's professional judgment or treatment decision.

→ Authentication & role based permissions should be included in the proposed system.

→ Identify stakeholders & their permitted interactions with the system.
